

Aria's Acute Lymphoblastic Leukemia Journey

On December 15, 2023 at the tender age of 3, Aria was diagnosed with ALL

Aria was in the hospital from December 15-23, 2023 and had many firsts. On December 16, Aria had her first ever procedure, which included her port being placed, first bone marrow aspiration, first of many spinal taps and first dose of chemotherapy in her spine. December 17th she had her first round of chemotherapy through her port.

Since diagnosis Aria has had 4 ER visits, 33 overnights in the hospital, 3 bone marrow aspirations, 5 blood transfusions, 5 platelet transfusions, 8 X-Rays, 11 spinal taps with chemotherapy in the spine, 31 chemotherapy days, some days more than one chemo, and 86 days of oral chemo at home.

Aria is a strong, courageous, smart little girl that doesn't deserve what is happening to her. Please keep Aria and her family in your thoughts and prayers.
